.3. AUDITED CODE

Comprehensive analysis of the code makes our system novel. Due to auditing, there stand no possibilities for bugs, security breaches or violations of programming protocols. It is an integral part of our process before the token launch, guaranteeing absolute security.

While auditing code, every critical component has been audited separately and together with the entire program, ensuring the swift and legitimate token distribution.

.4. PRACTICAL USECASE

Initially, cryptocurrency was considered a source of investment. With the dawn of tokens such as Citrus, one could practically use digital currencies to buy groceries to real estate, literally everything fiat money could do and more.

With Hybrid tokens, exchanges will happen at a low cost and high speed throughout the globe.
